

Sprint 1 Planning Document

AttireAI - Team 11

Team:

Yuanfei Song - song748@purdue.edu,
Yichen Dai - dai229@purdue.edu,
Congtian Wu - wu1908@purdue.edu,
Ekaterina Tszyao - etszyao@purdue.edu

Sprint Overview

Sprint 1 will focus on establishing the foundational infrastructure and core user-facing features of AttireAI. By the end of this sprint, users will be able to create accounts, log in using email/password or social authentication, input their body measurements (both manually and via camera detection), provide their style preferences and color information, and receive basic AI-generated outfit recommendations. The backend API, database schema, and frontend framework will be fully operational, allowing for seamless communication between components.

Scrum Master: Ekaterina Tszyao

Team members: Ekaterina Tszyao (E.T.), Yichen Dai (YD), Congtian Wu (C.W), Yuanfei Song (YS)

Meeting Schedule: Tuesday, Thursday, and Saturday at 8:00 PM EST

Risks and Challenges

- **Technology Learning Curve:** The team has limited experience with Next.js 14, FastAPI, and Firebase Authentication. We'll need to invest time in learning these technologies during the first week.
- **AI Model Integration:** Integrating body measurement detection and color analysis AI models may be more complex than anticipated, requiring careful testing and optimization.
- **API Integration:** Connecting to retailer and product APIs for outfit recommendations may present challenges with rate limits, data quality, and authentication.
- **Team Coordination:** With four team members working on interdependent features, clear communication and well-defined interfaces between components are critical.
- **Time Constraints:** Balancing coursework with project development requires disciplined time management and realistic workload estimates.

Current Sprint Details

User Story #1 - ID 1, 2

As a user, I would like to create an account using email or social login (Google, Microsoft, etc) so that I can save my preferences and measurements.

#	Description	Estimated Time	Owner
---	-------------	----------------	-------

1	Set up Firebase Authentication project and configure authentication providers (email/password, Google, Microsoft, etc)	3 hrs	C.W
2	Create sign-up page UI with form validation for email, password, and name fields	3 hrs	C.W
3	Implement sign-up functionality connecting frontend to Firebase Auth	3 hrs	C.W
4	Set up FastAPI backend endpoint to receive Firebase token and create user record in MySQL	3 hrs	C.W
5	<u>Test</u> sign-up flow with various input scenarios	1 hrs	C.W
6	Implement error handling and user feedback for sign-up failures	1 hrs	C.W

User Story #1 Total Hours: 14 Hours

Acceptance Criteria:

- Given a new user enters a valid email, password, and name, when they click "Create Account, then a new account should be created in Firebase Authentication, and they should be redirected to the onboarding page.
- Given a user enters an email that already exists in the system, when they attempt to create an account, then an error message "Email already in use" should be displayed.
- Given a user clicks "Continue with Google", when they complete Google OAuth, then they should be authenticated and redirected to the application.

User Story #2 - ID 3, 4

As a user, I would like to reset my password and log out securely.

#	Description	Estimated Time	Owner
1	Create login page UI with email/password fields	1 hr	C.W
2	Implement password reset functionality via email	1 hr	C.W
3	Create logout functionality and secure session management	1 hr	C.W
4	Manual <u>testing</u> for correctness	1 hr	C.W

User Story #2 Total Hours: 4 Hours

Acceptance Criteria:

- Given a user clicks "Forgot Password" and enters their email, when they submit, then they should receive a password reset email with a secure link.
- Given a user receives a password reset email and clicks the secure link, when they enter and confirm their new password (meeting minimum security requirements), then their password should be updated successfully and they should be redirected to the login page.
- Given a user is logged in, when they click "Log Out", then their session should be terminated, and they should be redirected to the login page.

User Story #3 - ID 5

As a user, I would like to view and edit my profile information.

#	Description	Estimated Time	Owner
1	Create profile page UI displaying user's name, email, and profile picture	1 hr	C.W

2	Add "Edit Profile" button that enables editing mode for name and profile picture	1 hr	C.W
3	Implement profile picture upload functionality	1 hr	C.W
4	Manual <u>testing</u> for correctness	1 hr	C.W

User Story #3 Total Hours: 4 Hours

Acceptance Criteria:

- Given a user navigates to the profile page, when the page loads, then their current name, email, and profile picture should be displayed.
- Given a user clicks "Edit Profile", when editing mode is enabled, then the name field should become editable and a file upload button for profile picture should appear.
- Given a user updates their name and clicks "Save", when the data is submitted, then the name field in the users table should be updated and a success message should be displayed.

User Story #4 - ID 7

As a user, I would like to manually input my body measurements.

#	Description	Estimated Time	Owner
1	Create measurement input page UI with manual entry form	2 hrs	C.W
2	Implement form fields for manual measurement entry (chest, waist, hip, inseam, shoulder width, arm length, height, weight)	1 hr	C.W

3	Add form validation to ensure measurements are within reasonable ranges	1 hr	C.W
4	Create API endpoint POST /api/measurements to save measurement profile to database	1 hr	C.W
5	Manual testing for correctness	1 hr	C.W

User Story #4 Total Hours: 6 Hours

Acceptance Criteria:

- Given a user inputs valid measurements in all required fields and clicks "Save Measurements", then the data should be stored in the measurement_profiles table with the user's ID.
- Given a user enters a measurement value outside the reasonable range (e.g., waist > 200 inches), when they attempt to save, then an error message "Please enter a valid measurement" should be displayed.
- Given a user has previously saved measurements, when they access the measurement input page, then the form should be pre-populated with their existing measurement data for easy editing.

User Story #5 - ID 13

As a user, I would like the system to convert measurements between metric and imperial units.

#	Description	Estimated Time	Owner
1	Add unit selection (CM/IN) to measurement input form	1 hr	C.W
2	Implement unit conversion functionality (CM <-> IN)	1 hr	C.W

3	Save the user's preferred unit system to their profile so it persists across sessions	2hrs	C.W
4	Update UI to dynamically display correct unit labels based on the selected system	1hr	C.W
5	Handle edge cases (rounding precision, empty fields, invalid inputs during conversion)	1.5 hrs	C.W
6	<u>Unit tests</u> for conversion accuracy across all measurement fields	1.5 hrs	C.W

User Story #5 Total Hours: 8 hr

Acceptance Criteria:

- Given a user switches between metric and imperial units, when the system converts measurements, then all values should be accurately recalculated and displayed.
- Given a user selects their preferred unit system, when they log out and log back in, then the system should remember and apply their preferred units.
- Given a user enters measurements in metric units, when they switch to imperial, then the converted values should be rounded to one decimal place to avoid confusing precision.
- Given a user has empty or invalid measurement fields, when they switch units, then the system should not crash and should only convert valid numeric values.
- Given a user switches units multiple times, when values are converted back and forth, then there should be no cumulative rounding errors that significantly alter the original values.

User Story #6 - ID 14

As a user, I would like to see which size I would be at different brands based on my measurements.

#	Description	Estimated Time	Owner
1	Create size recommendation logic based on measurements for different brands	4 hrs	YD
2	Create API endpoint GET /api/measurements to retrieve saved measurements	1 hr	YD
3	Implement measurement review/edit UI showing saved values	2 hrs	YD
4	Manual <u>testing</u> for correctness	1 hr	YD

User Story #6 Total Hours: 8 Hours

Acceptance Criteria:

- Given a user's measurements are saved, when viewing outfit recommendations, then the system should suggest appropriate sizes based on their measurements.
- Given different brands have different sizing charts, when recommendations are displayed, then the suggested size should be brand-specific.
- Given a user views a clothing item from a specific brand, when the size recommendation is displayed, then the system should show both the recommended size and a confidence indicator (e.g., "Best Fit", "May Run Small/Large").

User Story #7 - ID 15, 18

As a user, I would like to upload a photo for skin tone analysis or manually select my skin tone.

#	Description	Estimated Time	Owner
---	-------------	----------------	-------

1	Create color analysis page UI with photo upload option	3 hrs	YS
2	Implement photo upload functionality	2 hrs	YS
3	Add manual skin tone selection with color swatches (Fair, Light, Medium, Tan, Olive, Deep)	2 hrs	YS
4	Create API endpoint POST /api/color-profile to save color selections to database	2 hrs	YS
5	Manual <u>testing</u> for correctness	1 hr	YS

User Story #7 Total Hours: 10 Hours

Acceptance Criteria:

- Given a user uploads a photo, when the upload completes, then the photo should be stored and ready for analysis.
- Given a user manually selects a skin tone, when they make a selection, then that swatch should be highlighted as selected.
- Given a user saves their color profile, when the data is stored in the database, then the color_profiles table should contain their skin_tone and skin_tone_hex.

User Story #8 - ID 19

As a user, I would like to manually select or adjust my hair color.

Task Breakdown

#	Description	Estimated Time	Owner
---	-------------	----------------	-------

1	Design color swatches for hair color categories (Blonde, Red, Brown, Black, Gray, Other) with hex values	1 hr	YS
2	Implement hair color selection UI	0.5 hr	YS
3	Manual <u>testing</u> for correctness	0.5 hr	YS

User Story #8 Total Hours: 2 Hours

Acceptance Criteria:

- Given a user clicks on a hair color swatch, when they make a selection, then that swatch should be highlighted as selected.
- Given a user saves their color profile, when the data is stored in the database, then the color_profiles table should contain their hair_color and hair_color_hex.
- Given a user has previously selected a hair color, when they return to the color selection page, then their previously selected hair color swatch should be displayed as highlighted.

User Story #9 - ID 20, 21

As a user, I would like to see my color profile summary and receive color recommendations.

Task Breakdown

#	Description	Estimated Time	Owner
1	Create color profile summary display showing skin tone, hair color, and recommended palette	4 hrs	YS
2	Generate recommended color palette based on color theory rules	4 hrs	YS

3	Create API endpoint GET /api/color-profile to retrieve saved color profile	1 hr	YS
4	<u>Test</u> color profile display and palette generation	1 hr	YS

User Story #9 Total Hours: 10 Hours

Acceptance Criteria:

- Given a user has selected both skin tone and hair color, when they view their color profile, then they should see their selections and a recommended color palette.
- Given a user's color profile is saved, when recommendations are generated, then outfit colors should complement their skin tone and hair color.
- Given a user views their color profile summary, when the recommended palette is displayed, then each color in the palette should include a descriptive label (e.g., "Flattering Neutrals", "Accent Colors") explaining how it complements their profile.

User Story #10 - ID 22, 23, 24

As a user, I would like to select my preferred fashion styles.

#	Description	Estimated Time	Owner
1	Create style preferences page UI with multi-select cards for fashion styles	2 hrs	E.T.
2	Design style cards for categories (Minimalist, Streetwear, Classic, Bohemian, Preppy, Athleisure, Vintage, Elegant, Casual)	2 hrs	E.T.
3	Implement multi-select functionality allowing users to choose multiple preferred styles	2 hrs	E.T.

4	Add "styles to avoid" section with same categories for exclusion	1 hr	E.T.
5	Manual <u>testing</u> for correctness	1 hr	E.T.

User Story #10 Total Hours: 8 Hours

Acceptance Criteria:

- Given a user navigates to the style preferences page, when the page loads, then they should see cards for all available fashion styles with brief descriptions.
- Given a user clicks on a style card, when the card is selected, then it should be visually highlighted to indicate selection.
- Given a user has selected multiple styles, when they view their selections, then all selected styles should remain highlighted.

User Story #11 - ID 27, 28, 29

As a user, I would like to set price range and brand preferences.

#	Description	Estimated Time	Owner
1	Create price range selection dropdown (Budget, Mid-Range, Luxury)	1 hr	E.T.
2	Implement preferred brands input field	2 hrs	E.T.
3	Implement excluded brands input field	1 hr	E.T.
4	Create API endpoint PUT /api/preferences to save style preferences to database	2 hrs	E.T.

5	Create API endpoint GET /api/preferences to retrieve saved preferences	1 hr	E.T.
6	<u>Test</u> preferences saving and retrieval	1 hr	E.T.

User Story #11 Total Hours: 8 Hours

Acceptance Criteria:

- Given a user selects a price range, when they save their preferences, then the price_range field in the style_preferences table should be updated accordingly.
- Given a user enters preferred brands, when they type in the input field, then the brands should be saved to their preferences.
- Given a user clicks "Save Preferences", when the data is submitted, then all preferences should be stored as JSON in the database.

User Story #12 - ID 30, 31, 32

As a user, I would like to select occasion, weather, and dress code for outfit recommendations.

#	Description	Estimated Time	Owner
1	Create recommendations page UI with occasion selection dropdown	3 hrs	YS
2	Add occasion options (Formal Dinner, Casual Outing, Business Meeting, Date Night, Wedding Guest, Job Interview, Workout, Everyday Casual)	2 hrs	YS
3	Add weather/season selection dropdown (Spring, Summer, Fall, Winter, All Seasons)	3 hrs	YS

4	Add dress code selection dropdown (Black Tie, Business Formal, Business Casual, Smart Casual, Casual)	1 hr	YS
5	Manual <u>testing</u> for correctness	1 hr	YS

User Story #12 Total Hours: 10 Hours

Acceptance Criteria:

- Given a user navigates to the recommendations page, when the page loads, then they should see dropdown menus for occasion, weather/season, and dress code.
- Given a user selects an occasion, weather, and dress code, when they view their selections, then all choices should be clearly displayed before generating recommendations.
- Given a user has made selections in all three dropdowns (occasion, weather/season, and dress code), when they proceed to generate recommendations, then the system should validate that at least one selection has been made in each category before allowing them to continue.

User Story #13 - ID 35, 36

As a user, I would like to receive complete outfit recommendations with multiple items.

#	Description	Estimated Time	Owner
1	Set up FastAPI backend structure with database models and CORS configuration	6 hrs	YD
2	Implement backend recommendation engine combining rule-based logic and user preferences	12 hrs	YD
3	Create mock product data for testing recommendations	3 hrs	YD

4	Create API endpoint POST /api/recommendations to generate new outfit recommendations	4 hrs	YD
5	Implement logic to assemble complete outfits (top + bottom + shoes + accessories)	7 hrs	YD
6	Manual <u>testing</u> for correctness	1 hr	YD

User Story #13 Total Hours: 33 Hours

Acceptance Criteria:

- Given a user selects an occasion and clicks "Get Recommendations", when the system processes the request, then complete outfit options should be generated.
- Given an outfit is generated, when the user views it, then it should include multiple clothing items that work together (top, bottom, shoes, accessories).
- Given a user has specified style preferences, when recommendations are generated, then outfits should match their preferred styles.

User Story #14 - ID 37, 38, 40

As a user, I would like to see multiple outfit options with reasoning and request new recommendations.

#	Description	Estimated Time	Owner
1	Generate 5+ outfit options per recommendation request	4 hrs	E.T.
2	Create outfit card UI component displaying product images, names, brands, and prices	4 hrs	E.T.

3	Add "reasoning" display explaining why each outfit was recommended	4 hrs	E.T.
4	Add "Request New Recommendations" button functionality	2 hrs	E.T.
5	<u>Test</u> recommendation generation with different user profiles	2 hrs	E.T.

User Story #14 Total Hours: 16 Hours

Acceptance Criteria:

- Given a user requests recommendations, when the system processes the request, then at least 5 complete outfit options should be displayed.
- Given an outfit is displayed, when the user views it, then they should see product images, names, brands, prices, and a brief reasoning explanation.
- Given a user clicks "Request New Recommendations", when the system generates new options, then a different set of outfits should be displayed.

User Story #15 - ID 39

As a user, I would like to rate outfit recommendations so the system can learn my preferences.

#	Description	Estimated Time	Owner
1	Implement like/dislike rating buttons for each outfit	3 hrs	YD
2	Create API endpoint to save rating feedback to database	2 hrs	YD
3	<u>Test</u> rating functionality	1 hr	YD

User Story #15 Total Hours: 6 Hours

Acceptance Criteria:

- Given a user clicks the "like" button on an outfit, when the feedback is submitted, then the user_rating field in the outfit_recommendations table should be set to "LIKE".
 - Given a user clicks the "dislike" button on an outfit, when the feedback is submitted, then the user_rating field should be set to "DISLIKE".
 - Given a user has already rated an outfit, when they view the same outfit again, then the previously selected rating button (like or dislike) should be visually indicated as active.
-

User Story #16 - ID 71, 72, 73

As a user, I would like a clean, intuitive interface with responsive design and clear navigation.

#	Description	Estimated Time	Owner
1	Initialize Next.js 14 project with TypeScript and configure dependencies	2 hrs	E.T.
2	Create homepage UI that guides users through the recommendation process	6 hrs	E.T.
3	Create reusable layout component with navigation bar and menu items	4 hrs	E.T.
4	Implement responsive design for mobile, tablet, and desktop	8 hrs	YS
5	Configure Next.js API routes as proxy to FastAPI backend	3 hrs	YS

6	Manual <u>testing</u> for correctness	1 hr	YS
---	---------------------------------------	------	----

User Story #16 Total Hours: 24 Hours

Acceptance Criteria:

- Given the Next.js application is running, when a user navigates to the homepage, then they should see a clean, intuitive interface guiding them through the process.
 - Given a user clicks a navigation menu item, when the page loads, then they should be taken to the corresponding feature page.
 - Given a user accesses the application on different devices, when the page renders, then the layout should adapt appropriately for mobile, tablet, and desktop screen sizes.
-

User Story #17 - ID 74, 75, 78

As a user, I would like to see loading indicators, clear error messages, and theme options.

#	Description	Estimated Time	Owner
1	Create loading indicators for async operations	2 hrs	C.W
2	Implement error boundary components with clear error messages	3 hrs	C.W
3	Set up light/dark mode theme toggle with persistent preference	3 hrs	C.W
4	Manual <u>Test</u> loading indicator, clear error messages, and theme options	1 hr	C.W

User Story #17 Total Hours: 9 Hours

Acceptance Criteria:

- Given the application is loading data, when a request is in progress, then a loading indicator should be displayed to the user.
 - Given an error occurs, when the frontend receives the error, then a clear error message should be displayed explaining what went wrong.
 - Given a user toggles dark mode, when they refresh the page, then their theme preference should persist across sessions.
-

Sprint Workload Distribution

Name	Estimated Time
Ekaterina Tsziao	44 hrs
Congtian Wu	43 hrs
Yuanfei Song	44 hrs
Yichen Dai	47 hrs

Current Sprint Total: 178 Hours (Target: ~44 hours per person)

Breakdown by User Story:

- **User Story #1 (Create Account): 12 hrs**
- **User Story #2 (Password Reset & Logout): 4 hrs**
- **User Story #3 (Profile Management): 4 hrs**
- **User Story #4 (Manual Measurements): 6 hrs**
- **User Story #5 (Unit Conversion and Save): 8 hrs**
- **User Story #6 (Size Recommendations): 8 hrs**
- **User Story #7 (Skin Tone Selection): 10 hrs**
- **User Story #8 (Hair Color Selection): 2 hrs**
- **User Story #9 (Color Profile & Recommendations): 10 hrs**
- **User Story #10 (Style Selection): 8 hrs**
- **User Story #11 (Price & Brand Preferences): 8 hrs**
- **User Story #12 (Occasion Selection): 10 hrs**
- **User Story #13 (Generate Recommendations): 33 hrs**

- User Story #14 (View Outfits & Reasoning): 16 hrs
- User Story #15 (Rate Outfits): 6 hrs
- User Story #16 (Frontend Setup & UI): 24 hrs (half ET half YS)
- User Story #17 (Loading, Errors, Theme): 9 hrs

Remaining Backlog

User Authentication & Account Management

ID	User Story	Hours
1	As a user, I would like to create an account using my email address so that I can save my preferences and measurements.	6
2	As a user, I would like to log in using social login options (Google, Microsoft, Apple) for faster access to my account.	6
3	As a user, I would like to reset my password via email if I forget it.	2
4	As a user, I would like to log out of my account securely from any device.	1
5	As a user, I would like to view and edit my profile information (name, email, profile picture).	4
6	As a user, I would like to delete my account and all associated data if I no longer wish to use the service.	2

Body Measurements

ID	User Story	Hours
7	As a user, I would like to manually input my body measurements (waist, chest, hip, inseam, shoulder width, arm length, height, weight) so the system can recommend properly fitting clothes.	6
8	As a user, I would like to use my device's camera to automatically capture my body measurements through live detection technology.	36
9	As a user, I would like to receive on-screen guidance during the live measurement process to	8

	ensure accurate capture (e.g., "Stand 6 feet away", "Turn sideways").	
10	As a user, I would like to review and confirm the automatically detected measurements before saving them.	2
11	As a user, I would like to edit individual measurements if the automatic detection was inaccurate.	3
12	As a user, I would like to save multiple measurement profiles (e.g., for different family members).	5
13	As a user, I would like the system to convert measurements between metric and imperial units based on my preference.	2
14	As a user, I would like to see which size I would be at different brands/retailers based on my measurements.	8

Color Analysis

ID	User Story	Hours
15	As a user, I would like to upload a photo of myself for skin tone analysis so that recommended outfits complement my complexion.	8
16	As a user, I would like to use my device's camera to capture my skin tone in real-time.	10
17	As a user, I would like the system to detect my hair color from an uploaded or captured photo.	6
18	As a user, I would like to manually select or adjust my skin tone category if the automatic detection is inaccurate.	2
19	As a user, I would like to manually select or adjust my hair color if the automatic detection is inaccurate.	2
20	As a user, I would like to see my color profile summary (skin tone, hair color, recommended color palette) in my account.	4
21	As a user, I would like to receive recommendations for clothing colors that complement my skin tone	6

	and hair color.	
--	-----------------	--

Style Preferences

ID	User Story	Hours
22	As a user, I would like to select my preferred fashion styles from a list (minimalist, streetwear, classic, bohemian, preppy, athleisure, vintage, etc.) so recommendations match my taste.	4
23	As a user, I would like to select multiple style preferences to receive diverse outfit suggestions.	2
24	As a user, I would like to indicate styles I want to avoid so they are excluded from recommendations.	2
25	As a user, I would like to take a visual style quiz where I choose between outfit images to help the system understand my preferences.	12
26	As a user, I would like to update my style preferences at any time.	1
27	As a user, I would like to set preferred price ranges (budget, mid-range, luxury) for outfit recommendations.	3
28	As a user, I would like to specify preferred brands or retailers I like shopping from.	3
29	As a user, I would like to specify brands or retailers I want to exclude from recommendations.	2

Occasion Selection

ID	User Story	Hours
30	As a user, I would like to select an occasion type (formal dinner, casual party, business meeting, date night, wedding guest, job interview, workout, everyday casual, etc.) when requesting outfit recommendations.	4
31	As a user, I would like to specify the weather/season for the occasion so recommendations are weather appropriate.	4

32	As a user, I would like to specify a dress code if applicable (black tie, business casual, smart casual, etc.):	2
33	As a user, I would like to save frequently used occasions as presets for quick access.	4
34	As a user, I would like to add custom occasion types if my specific need isn't listed.	2

AI Outfit Recommendations

ID	User Story	Hours
35	As a user, I would like to receive complete outfit recommendations based on my measurements, color profile, style preferences, and selected occasion:	25
36	As a user, I would like each outfit recommendation to include multiple clothing items that work together (top, bottom, shoes, accessories):	8
37	As a user, I would like to see multiple outfit options (at least 5) for each recommendation request so I can choose my favorite:	6
38	As a user, I would like to view the reasoning behind each recommendation (e.g., "This color complements your skin tone", "This cut flatters your body type"):	8
39	As a user, I would like to rate outfit recommendations (like/dislike) so the system can learn my preferences over time:	6
40	As a user, I would like to request new recommendations if I don't like the current suggestions:	2
41	As a user, I would like to filter recommendations by specific criteria (color, price, brand, item type).	6
42	As a user, I would like to see alternative items for any piece in a recommended outfit (e.g., "Show me other pants that would work with this outfit").	8
43	As a user, I would like the system to learn from my rating history and improve recommendations over time.	12

Product Information & Purchase

ID	User Story	Hours
44	As a user, I would like to see detailed product information for each recommended item (name, brand, material, care instructions).	4
45	As a user, I would like to see the price for each recommended item.	2
46	As a user, I would like to see which size I should order for each item based on my measurements.	6
47	As a user, I would like to click a direct purchase link that takes me to the retailer's website to buy the item.	4
48	As a user, I would like to see the total estimated cost of a complete outfit.	2
49	As a user, I would like to see if recommended items are in stock in my size.	6
50	As a user, I would like to be notified when items in my saved outfits go on sale.	8
51	As a user, I would like to compare prices across different retailers for the same or similar items.	8

Saved Items & History

ID	User Story	Hours
52	As a user, I would like to save outfit recommendations to a favorites/wishlist for future reference.	4
53	As a user, I would like to organize saved outfits into custom collections (e.g., "Work Outfits", "Weekend Looks", "Special Events").	6
54	As a user, I would like to view my recommendation history to revisit past suggestions.	4
55	As a user, I would like to remove items from my saved collections.	1
56	As a user, I would like to share saved outfits with	6

	friends via social media or messaging.	
57	As a user, I would like to mark items I've already purchased to track my wardrobe.	4
58	As a user, I would like to receive outfit suggestions using items I've already purchased/owned.	12

Virtual Try-On - VIP Feature (VIRTUAL TRY-ON)

ID	User Story	Hours
59	As a VIP user, I would like to upload a full-body photo of myself for virtual try-on purposes.	6
60	As a VIP user, I would like to see realistic preview images of recommended outfits rendered on my uploaded photo.	35
61	As a VIP user, I would like to try on individual items on my photo, not just complete outfits.	12
62	As a VIP user, I would like to save virtual try-on images to my account for later review.	4
63	As a VIP user, I would like to compare multiple virtual try-on images side by side.	6
64	As a VIP user, I would like to share my virtual try-on images with friends for feedback.	4
65	As a VIP user, I would like to view virtual try-on results from different angles if multiple photos are provided.	15

VIP Subscription

ID	User Story	Hours
66	As a user, I would like to view the benefits of VIP subscription before subscribing.	2
67	As a user, I would like to subscribe to VIP membership to access virtual try-on and premium features.	8
68	As a VIP user, I would like to manage my	6

	subscription (view status, cancel, update payment method).	
69	As a VIP user, I would like to receive unlimited outfit recommendations (vs. limited for free users).	4
70	As a user, I would like to receive a free trial of VIP features before committing to a subscription.	6

User Interface & Navigation (UI/UX)

ID	User Story	Hours
71	As a user, I would like a clean, intuitive homepage that guides me through the recommendation process.	8
72	As a user, I would like to access all main features from a clear navigation menu.	4
73	As a user, I would like the website to be responsive and work well on both desktop and mobile browsers.	12
74	As a user, I would like to see loading indicators when the system is processing my requests.	2
75	As a user, I would like to receive clear error messages if something goes wrong.	3
76	As a user, I would like to access a help/FAQ section to learn how to use the application.	4
77	As a user, I would like to complete an onboarding tutorial when I first create an account.	6
78	As a user, I would like to switch between light and dark mode themes.	4

Admin Features

ID	User Story	Hours
79	As an administrator, I would like to view user statistics and analytics (total users, active users, popular features).	8
80	As an administrator, I would like to manage the	10

	product database (add, edit, remove clothing items).	
81	As an administrator, I would like to manage retailer partnerships and affiliate links.	6
82	As an administrator, I would like to review and respond to user feedback/support requests.	4
